

UPPER KEY STAGES and EXAM GROUPS

Music for All @ SMSG can best support Citizenship studies in the area of volunteering and community engagement. For the Restoration of the Willis Pipe Organ Project we have undertaken and completed an 11 year programme to bring the organ back into full working order, extend it to realise the hopes of its builder and safeguard its future maintenance.

We have experience in bid writing, project management, recruiting volunteers, accounting, publicity, advertising, research, putting on concerts and events, engaging with the press and the public and many other skills.

We would be pleased to share our expertise and provide examples of the processes involved for the successful outcome of this particular project.

Please contact the Visits Team at visits@musicforallsmg.org to discuss the specific requirements we can provide for the students' learning.

Bring them to an event at SMSG as audience or we can arrange for 'hands-on' experience as a volunteer member.
